

DAppNode

Dear Nodler,

Upon setting up your new DAppNode, you are achieving true unrestricted access to the decentralized world.

Your DAppNode can now become a trusted portal to various blockchains, web3 and your favorite DApps in an uncensorable and resilient way for you and your community.

At DAppNode we work hard to make this vision come true, and thanks to nodlers like you, willing to take decentralization seriously, blockchain networks become more resilient, private and secure for everyone. This box, and the open source software held within, empowers you to trust that you have the true state of the decentralized world. Your privacy is now better

protected and you are reducing the dependence our community has on large centralizing third-party node providers.

This is why we must say THANK YOU for your contribution to the very important hardware layer of decentralization movement, and to the continued development of the DAppNode software project, which is driven and funded by YOU and the rest of the community.

Now you can enter <https://welcome.dappnode.io> and start enjoying your node, your rules, your freedom !

With Gratitude,

The DAppNode Team
